## Location Review - Eagle Court, Birmingham

---

2006

[www.ewlocations](http://www.ewlocations.com)

## east west locations

### <Unique - Independent - Reliable>

Since 1998 we have built a solid national reputation for delivering intensive and uncompromising research to those engaged in inward investment, economic development and the property market.

### <East West's Location Review Series>

Using a blend of economic and statistical research alongside employee commute patterns the Location Review Series has demonstrated the strengths of many employment locations throughout the country.

We have prepared Reviews covering office space, contact centres, Business Parks, Technology Parks, manufacturing facilities and warehousing and distribution operations.

### <City Region Analysis>

As the City Region concept becomes more important it has never been more crucial to understand how an area works, where linkages with other areas exist and, most importantly of all, how the benefits of economic development initiatives can be maximised.

### <Other Work>

We also become involved in forensic economics, acting as expert witness, the assessment of economic impacts and a range of other economic development projects.

### <The East West Approach>

All of our work is based on real-world commute patterns and not administrative areas.

This is our strength that others cannot match.

If you require a specific Location Review, are engaged in attracting and retaining employers in your area or need other economic development advice then we'd like to talk with you about what we can do.
